

FUNKI FIBER

Equipment for weaners and finishers

- The core of this is 10 mm massive compact panels instead of PVC board profiles
- Fully closed equipment, each pipe ends with the PVC adapter
- No hidden places where manure can be accumulated
- In every way a complete system, where everything is finalized
- No cavities, only smooth surfaces, lasting quality

| FUNKI FIBER |

Made of massive compact panels - specially designed for weaners and finishers

FUNKI FIBER with the gate in full width

FUNKI FIBER is our newly developed penning equipment for weaners and finishers. The core of the equipment is 10 mm massive compact panel, which, despite its thickness, is an extremely strong and durable material.

The entire construction is made of the compact panels without posts, and all the pipes end with the PVC adapters or plugs. It helps to reduce accumulating of manure in the difficult accessible places.

TYPES OVERVIEW	Height, cm		
	75	88	100
Compact panel and 1 top pipe	x	-	-
Compact panel and 2 top pipes	-	x	-
Compact panel and 3 top pipes	-	-	x
Suspended gate	-	x	x
Gate in full width	x	x	x

FUNKI FIBER with the regular suspended gate

Subject to changes in materials and design is reserved.
